

About Us: Overview

Tracking time and attendance

- Recording client contact times
- Verifying Routine maintenance services
- Monitoring security patrols
- Guaranteeing cleaning services
- Measuring vehicle / machinery use and motor vehicle travel log
- Critical equipment service - audit reviews
- Needing to verify temperature controls

DAELIBS Hardware

Electronic Portable and Fixed Location Time Clocks

DAELIBS Electronic Data replaces handwritten:

- Time-books
- Service sheets
- Run Sheets

Client job hours and service attendance times are recorded accurately electronically for payroll, invoices and service reports.

seek'nfind Software

seek'n**find** is an analysis tool for auditing date and time associated events and activities.

seek'n**find** features the ability to drill down from Data Summary Tables through various levels of information to the raw data source. Raw data from DAELIBS Data Loggers is downloaded into the seek'n**find** data management program

seek'n**find** is used to produce a variety of audit reports:

- Exception Attendance reporting for security
- Cycle time (frequency) reporting for cleaning
- Incident events involved with cleaning and security
- Employment attendance times for Time Sheets
- Job time costing in workshops
