

Software: Security

This SeeknFind package has been designed by end users who have requested a customized analysis program to report the actual number of service delivered against the planned number of scheduled tasks. The exceptions report provides an instant snapshot view of the quality control of the service provision against the planned program.

Visits by Location, generate reports for clients to show when a location has been attended

BR Back gate (539 Brighton Road)		
Date	Time	Person
23 Jun 2002	02:45	Bravo 001
23 Jun 2002	06:25	Alpha 001
23 Jun 2002	11:58	Alpha 001
23 Jun 2002	21:50	Bravo 001

Exceptions Reports quickly identifies under and over servicing of inspection locations.

Exception Report 23 Jun 2002 - 23 Jun 2002						
Client	Title	Total Expected	Total Visits	Missed Visits	Excess Visits
