

Software: Vanilla

The SeeknFind Vanilla package is a base level package that can be adapted for use in a variety of applications where basic verified time and attendance reporting is required. Reports by iButton location and DAELIBS Logger provide powerful audit information for cleaning, security, and service maintenance applications.

iButton Reports

Reports by iButton identify with a date and time stamp which Loggers have read the iButton.

Button: Front gate				
Logger Id	Logger Title	Date	Time	Difference
001083	Alpha 002	15-Jun-2002	11:38:35	
001084	Bravo 001	15-Jun-2002	16:35:39	04:57:04
001083	Alpha 002	15-Jun-2002	20:27:54	03:52:15
001083	Alpha 002	15-Jun-2002	22:53:32	02:25:38

Logger Reports

Reports by Logger details with a date and time stamp which iButtons have attended by the person who has been allocated a DAELIBS Logger.

Logger: Bravo 001				
Button Id	Button Title	Date	Time	Difference
00000853788D01	LS Front pole	17-Jun-2002	00:55:38	
00000853934201	SR Wooden gate	17-Jun-2002	01:02:22	00:06:44
000008509AFF01	SR Admin door	17-Jun-2002	01:18:01	00:15:39

This package is an excellent low cost package for the user to start using SeeknFind and capturing their required data on the DAELIBS loggers.

The reported data from iButton or Logger can be exported via CSV (Comma Separated Variable) file transfer into Microsoft Excel worksheet for E-mail or other information sharing purposes.

If a customized report based on the Vanilla package data is required the development of this output can be discussed with a DKTOB Technical Staff member.

The SeeknFind Vanilla software package is a general purpose program that will report time and attendance information. It is ideally suited to small operations where it is necessary to have a verified record of the attendance to a location or piece of equipment
